

IgG Fraction Rabbit Anti-Endothelin 1 Serum

AS-1867

Lot # 1792

The antiserum was raised in a rabbit which was immunized with synthetic endothelin 1 covalently attached onto a carrier protein. This antiserum is class specific for endothelin 1 and is suitable for use in immunohistochemical procedures. Dilute the lyophilized antiserum with 0.1 ml of 10 mg/ml BSA in PBS for the equivalent of whole antiserum, or with additional buffer for more dilute antiserum.

Polypeptide	Antiserum Specificity	% Cross Reactivity
Endothelin 1		100
ACTH (human, 1-39)		0
Calcitonin (human)		0
Oxytocin		0
Vasoactive Intestinal Peptide		0
