

**Rabbit Anti- $\beta$ -Amyloid(1-28) Serum**

AS-1916

Lot # 6335

The antiserum was raised in a rabbit which was immunized with  $\beta$ -amyloid(1-28) covalently attached onto a carrier protein. The antiserum is specific for this peptide and is suitable for immunocytochemical detection of  $\beta$ -amyloid. This antiserum has been characterized immunocytochemical, RIA and ELISA techniques Dilute the lyophilized antiserum with 0.1 ml of 10 mg/ml BSA in PBS for the equivalent of whole antiserum, or with additional buffer for more dilute antiserum.

**Antiserum Specificity**
