

Rabbit Anti-Human Insulin-like Growth Factor II Serum

AS-2796

Lot # 1966

These pooled antisera were raised in a rabbit which were immunized with human insulin-like growth factor II covalently attached onto a carrier protein. These pooled antisera are specific for this peptide analog and is suitable for immunohistochemical detection of human IGF-II. Dilute the lyophilized antiserum with 0.1 ml of 10 mg/ml BSA in PBS for the equivalent of whole antiserum, or with additional buffer for more dilute antiserum.

Polypeptide	Antiserum Specificity	% Cross Reactivity
Insulin-like growth factor II (human)		100
IGF-1 (human)		1
Insulin (human)		<1
Atrial natriuretic polypeptide (human)		0
EGF		0
TGF α		0
