

**Rabbit Anti-Rat Atrial Natriuretic Peptide Sera**

AS-618

Lot # 4351

These pooled antisera were raised in rabbits which were immunized with rat atrial natriuretic polypeptide (28 amino acid sequence) covalently attached onto a carrier protein. These antisera are specific for rat ANP and are suitable for immunocytochemistry, immunoprecipitation and passive immunization. Dilute the lyophilized antisera with 0.1 ml of 10 mg/ml BSA in PBS for the equivalent of whole antisera, or with additional buffer for more dilute antisera.

**Pooled Antisera Specificity**

<b>Polypeptide</b>	<b>% Cross Reactivity</b>
Atrial Natriuretic Peptide (rat)	100
Atrial Natriuretic Peptide (human)	80
ACTH	0
Calcitonin (human)	0
PTH (human 1-84)	0
Vasoactive Intestinal Peptide	0
