

**Immunoprecipitating Rabbit Anti-Human,Rat CRF Serum**

IP-916

Lot # 7508

This antiserum was raised in a rabbit which was immunized with synthetic human,rat CRF covalently attached onto a carrier protein. The antiserum was tested by RIA techniques for recognition and immunoprecipitation of CRF and related molecules. This antiserum is specific for CRF and can be used to immunoprecipitate CRF from cell and tissue extracts.

**Antiserum Specificity**

<b>Polypeptide</b>	<b>% Cross Reactivity</b>
Corticotropin Releasing Factor (human, Rat)	100
Corticotropin Releasing Factor (Ovine)	< 0.1
ACTH	0
Calcitonin (salmon)	0
PTH (human 1-84)	0
Vasoactive Intestinal Peptide	0

**Utilization**

Rehydrate the lyophilized powder with 0.1 ml of PBS containing 10 mg/ml BSA for the equivalent of whole antiserum or with additional buffer for more dilute antiserum. Do not subject this antiserum to repeated freeze/thaw cycles.
